For Men Only

Nowadays, not only women want to look fresh and attractive... but great looks need special care! Daily shaves, stress, environmental influences and natural aging processes take their toll on men's skin. Reaching quickly into your wife's cream pot cannot be the right answer because men's skin is 25% thicker than a woman's and tends to produce more sebum. Dehydrated, tired and sensitive male skin definitely requires its own kind of care.

Pantai Luar
exclusively at the Hotel Bär

PANTAI LUAR™ is a very special and quite ancient East Asian treatment.

The application

Two fruit/herb stamps are heated in plant extract oil to a temperature of max. 140° C. With these pre-heated stamps, quick and short tactile pressings are undertaken. These simulate a burn process, which of course does not take place. Subsequently, rapid, flowing movements stroke the entire body. It is a wonderful feeling, the warmth flows as a wave throughout the body, preparing it for an intensive deep warmth treatment. Then rotating and rolling

applications are performed with the fruit/herb stamps in accord with pre-determined treatment processes. Due to the preheating of the stamps within hot oil, appointments can be booked only from 2:00 pm.
